## IN THE CLAIMS

P	lease	amend	the	Claims	as	follows.

- 1. (Canceled)
- 1 2. (Currently amended) A stent delivery system, the system comprising:
- a) an inner shaft having a proximal end and a distal end;
- b) an outer shaft moveable with respect to the inner shaft, the outer shaft having a
- 4 proximal end and a distal end;
- 5 c) a stent receiving area on the inner shaft adjacent the inner shaft distal end;
- d) a tip mounted on the inner shaft distal end;
- e) means coupled to the inner shaft and outer shaft for manipulating the outer shaft with
- 8 respect to the inner shaft;
- 9 f) a stent positioned in the stent receiving area; and
- g) a channel spacer assembly disposed between the inner shaft and the outer shaft, said
- 11 spacer assembly including a channel spacer wherein said spacer assembly supports said inner
- 12 shaft with respect to said outer shaft by eliminating slack when said outer shaft is moved with
- 13 respect to said inner shaft.
- 1 3. (Previously Amended) The stent delivery system of claim 2 wherein the channel
- 2 spacer defines a plurality of channels extending along a length of a lumen defined between the
- 3 outer shaft and the inner shaft.
- 1 6. (Previously Amended) The stent delivery system of claim 2 and further comprising
- 2 a radiopaque marker on the inner shaft approximate the stent receiving area.
- 1 7. (Previously Amended) The stent delivery system of claim 2 and further comprising
- 2 a coupling member and a valve relief on said outer shaft, the coupling member selectively
- 3 coupling the valve relief to the outer shaft.
- 1 8. (Previously Amended) The stent delivery system of claim 2 wherein the means

- 2 coupled to the outer shaft and inner shaft comprises a handle with a reciprocating knob coupled
- 3 to the outer shaft whereby the outer shaft is moved with respect to the movement of the knob.
- 1 9. (Previously Amended) The stent delivery system of claim 2 wherein the means
- 2 coupled to the outer shaft and inner shaft includes a moveable knob coupled to the inner shaft for
- 3 moving the inner shaft longitudinally with respect to the outer shaft.

1

- 2 10. (Previously Amended) The stent delivery system of claim 2 wherein the tip has a
- 3 proximal end and a distal end and the tip is tapered towards its distal end
- 1 11. (Previously Amended) The stent delivery system of claim 2 wherein the stent
- 2 receiving area has a stent stop.
- 1 12. (Previously Amended) The stent delivery system of claim 2 wherein a stent stop
- 2 comprises a radiopaque marker.
- 1 13. (Previously Amended) The stent delivery system of claim 2 and further comprising
- 2 a radiopaque marker on the distal end of the outer shaft.
- 1 14. (Previously Amended) The stent delivery system of claim 2 wherein the stent has a
- 2 plurality of segments in a first radial position and a plurality of second segments in a second
- 3 radial position when in an unexpanded configuration.

## 15-19. (canceled)

- 1 20. (New) A stent delivery system, the system comprising:
- a) an inner shaft having a proximal end and a distal end:
- b) an outer shaft moveable with respect to the inner shaft, the outer shaft having a
- 4 proximal end and a distal end;
- 5 c) a stent receiving area on the inner shaft adjacent the inner shaft distal end;

- d) a tip mounted on the inner shaft distal end;
- 7 e) a knob of a handle coupled to the inner shaft and a housing of said handle coupled to
- 8 said outer shaft wherein relative motion of said knob with respect to said housing in a slot in said
- 9 housing causes motion of the outer shaft with respect to the inner shaft; and
- 10 f) a stent positioned in the stent receiving area.
- 1 21. (New) The stent delivery system as in Claim 2, wherein said slot in said housing includes
- 2 a longitudinal section.
- 1 22. (New) The stent delivery system as in Claim 21, wherein said slot in said housing
- 2 includes a transverse slot connected to said longitudinal slot section.
- 1 23. (New) The stent delivery system as in Claim 20, wherein said slot in said housing
- 2 includes a longitudinal section.
- 1 24. (New) The stent delivery system as in Claim 23, wherein said slot in said housing
- 2 includes a transverse slot connected to said longitudinal slot section.
